

a passion to inspire

Enviromental Policy

Steelite International work closely with a number of suppliers and organisations to develop working methods and adopt procedures that help minimise our impact on the environment. Steelite International is accredited with the ISO 14001:2004 Environmental Management Standard and has 5 star membership status of the Green Organisation. Our Lamella has been awarded a Gold Green Apple Award for 2010.

We are helping secure an environment that is fit for life. We save 243,800kg of CO² every year by recycling 400 tonnes of clay waste through our unique lamella system.

The following are examples of Steelite International's environmental management activities.

- Pitcher waste & pins are 100% recycled as raw material for H&R Johnson.
- Plaster mould waste is 100% recycled by Cheadle recycling for raw material in cement body.
- Cardboard & paper are 100% recycled through Browns and Severnside.
- Glass is 100% recycled by Browns, ground to dust for glass body material.
- Clean refractory waste is 100% recycled via Grange Aggregates for raw material.
- General waste is separated at Browns sorting unit, everything recyclable is segregated and recycled.
- Lamella system recycles up to 400 tonnes of clay waste per year from the manufacturing process; waste which prior to the installation of the Lamella was sent to land fill. By recycling clay waste, Steelite International save up to 243 tones of CO² every year.

Packaging

- 100% sustainable source
- 100% biodegradable

Energy Management

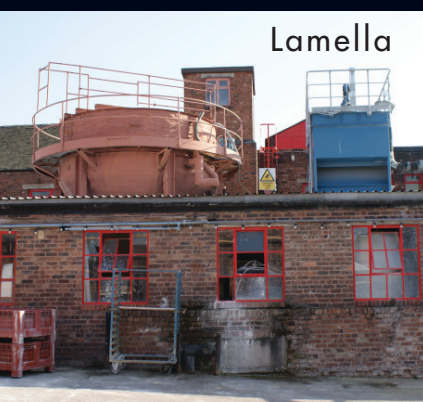

- Low temp glaze reduces firing temperature by 86°F, saving 68 tonnes of CO² per year
- Sensor lighting in warehouse aisles

Recycling

2011 total waste of 3464 tonnes. Recycled 3382 tonnes, 97% of all waste.

We're extremely proud of our environmental policy and are continually monitoring, developing and improving the procedures to create minimum impact on the community and environment.
