Ideas for Room Service

The Thermal serving unit © is used to maintain heat or cold. To heat, the disk may be placed in an oven at 140° C - 302°F. To chill, the disk may be placed in a freezer - 57°F. The temperature of the food placed on the disk in the Thermal serving unit © will maintain temperature for about 20 or 30 minutes at the desired temperature (from - 41°F to +122°F). A revolutionary solution safe and economical. No more open flames or burners, thus conforming with the most stringent fire regulations.
